

SAMEER CHOUBEY

104 ◇ Prefab-II, NIT Sikkim

(+91) 9983522351 ◇ bit.ly/2ZibGVF ◇ github.com/sameerchoubey

EDUCATION

National Institute of Technology, Sikkim

August 2017 - Present

Second Year Undergraduate

Department of Electronics and Communication Engineering

WORK EXPERIENCE

Zulip Chat

November 2018 - Present

Open Source Developer

- I have been contributing to Zulip Chat, one of the largest open-source chat system.
- Till now, I've worked in the integrations area where I enhanced the Stripe, Taiga and JIRA webhook integration into the Zulip server. I have also worked on the Zulip's PyPI API Bindings.
- I've made 25 commits with over 1000+ lines of code additions to the Zulip codebase.
- Technology Used - Python and Django

Web Development Cell, NIT Sikkim

Feb 2018 - Present

Fullstack Web Developer

- I'm part of the team that looks after the institute's website.
- I've worked extensively on one of the largest project of WDC that made the institute's semester registration online.
- Technology Used - HTML, CSS, JavaScript, PHP/MySQL and Django/Flask.

Moodcafe Wellness Private Limited

Jan 2019 - Feb 2019

Frontend Web Developer Intern

- I completely redesigned the UI of the website.
- I worked on the Self Help, Experts, Anonymous Chat and the landing page.
- Technology Used - HTML, CSS and JavaScript.

TECHNICAL SKILLS

Languages

Python, C, C++ and Java

Web

HTML, CSS, JavaScript, Django, Flask and PHP

Tools/Frameworks

GIT, LATEX and Pytest

Database

MySQL, PostgreSQL and SQLite

PROJECTS

Project DSS

August 2018 - Present

<https://goo.gl/VAPqqq>

This project focuses on making the student semester registration completely online. I'm looking extensively after the back-end part. I worked on the student registration, profile edit section and the attendance update system. An initial version of this project was used in the odd semester for student registration. The expansion to this portal is still going on.

Technology Used - HTML, CSS, JS, PHP and MySQL.

A Custom Blog Built in Flask/Django

Sept 2018 - Nov 2018

<https://sameer-django-blog.herokuapp.com>

- A custom blog built from scratch in Python's micro framework Flask, with various features. This blog has many several including Login/SignUp, ability for the user to create, update and delete posts. also developed an exact copy of this blog in Django.

Technology Used - Bootstrap and Django/Flask

POSITION OF RESPONSIBILITY

· Kickoffcoding.com

October 2017 - January 2019

Founder and CEO

Started the website to help my classmates with the assignment of CS11101 (Introduction to Computer Science and Programming) and CS13101 (Data Structure and Algorithms).

IQuanta Edu Services

Jan 2018 - March 2018

Content Writer

I was responsible for writing CAT related content on several social media channels like Quora and Facebook.

Marriage Glitz

Sept 2017 - Nov 2017

Content Writer

I was responsible for writing content related to cryptocurrency space. I mostly wrote on the upcoming ICOs (Initial Coin Offering).

TravelALittle.com

April 2014 - May 2016

Co-founder

I co-founded a travel blog that used to publish travel guides and interviews of travel bloggers. Later, I sold off my stake in this blog to my co-founder.

Trickimania.com

March 2013 - October 2013

Founder and CEO

I started the blog where I used to publish How-To tech tutorials. I further scaled the blog to 300+ pageviews per day by writing good content and optimizing the blog with both On Page and Off Page SEO. Later I sold it for 100 USD.
